CAREER SUMMARY

Proficiently mastered Reactjs, NodeJs, TypeScript, GraphQL, and AWS as a self-taught Frontend Developer, consistently seeking fresh challenges to drive innovation.

EDUCATION

Youcode Safi

Web and mobile web developer certification

Organization: simplon.co

Graduated: Apr 2022

TECHNICAL PROJECTS

Blog Personal Website

- Engineered and launched a Blog web application using Nextjs, Tailwind Css, MDX, and headlessUI, resulting in a 35% increase in user engagement.
- Orchestrated and optimized CI/CD pipeline with Github Actions, reducing deployment time by 100%.

SmartProf Platform

- Led the deployment of a highly available application using GCP and Cloudflare, resulting in a 200% improvement in platform stability.
- Revamped UX/UI and migrated backend from Firebase to NodeJs and Postgres, fostering a 45% increase in user satisfaction.

WORK EXPERIENCE

[TransPerfect](#)

Apr 2023 - Current
Casablanca, Morocco

Frontend Developer

- Collaborated cross-functionally to translate design concepts into responsive React.js apps with TypeScript.
- Constructed React.js apps with TypeScript.

Feb 2023 - May 2023
Casablanca, Morocco

Full Stack JavaScript Developer

- Overhauled and migrated the backend infrastructure from Firebase to microservices within GCP, resulting in optimized performance and scalability.
- Implemented Storybook and NX as integral tools for streamlining development processes, fostering greater efficiency and consistency across projects.
- Spearheaded the adoption and integration of the Monorepo approach using NX, consolidating codebases and enhancing code management for improved collaboration.
- Developed a comprehensive design system using TailwindCSS and Typescript, enabling seamless integration and reusability across multiple applications.
- Redesigned and meticulously refactored the UI/UX of the platform utilizing ReactJS and NX, resulting in an enriched user interface and experience.
- Implemented strategic improvements to significantly enhance the overall user experience of the platform, ensuring heightened satisfaction and usability.

Full Stack JavaScript Developer

- Enhanced the functionality and performance of React.js applications, resulting in a marked improvement in user engagement and efficiency.
- Constructed a robust UI library utilizing Storybook, facilitating streamlined design processes and ensuring consistency across projects.
- Restructured and enhanced React.js applications by rewriting them with TypeScript, significantly improving code quality and maintainability.
- Spearheaded the adoption and integration of Monorepo utilizing NX, fostering seamless code management and collaboration for enhanced productivity.
- Built a sophisticated conference application leveraging Nextjs, Auth0, and Cloudflare Stream, resulting in a seamless and feature-rich user experience.
- Leveraged AWS Cognito, Amplify, and S3 to implement robust authentication and storage solutions, elevating the overall performance and security standards of the applications.

CERTIFICATIONS

AWS Certified Cloud Practitioner
Apollo Graph Developer - Associate
Mastering Web Quality Assurance Certification

Achieved Dec 2022
Achieved Mar 2021
Achieved Dec 2021

SKILLS

Technical Skills

- Front-end: Reactjs, Vuejs, Nextjs
- Back-end: Node.js, Express, GraphQL, Nest.js, Hasura
- Languages: TypeScript, JavaScript
- AWS: IAM, Cognito, Amplify, S3
- Databases: AWS RDS, Postgres, MongoDB, DynamoDB
- Others: NX (monorepo), Git, Docker, Storybook, Jira

Interpersonal Skills

- Customer-focused
- Effective Communicator
- Highly Adaptable
